

WEKIVA PARKWAY

Completing Central Florida's Beltway

Access to Wekiva Park Drive Changing

Crews are scheduled January 18-19 to shift State Road (S.R.) 46 traffic onto the new service road bridge over the Wekiva River as part of building the Wekiva Parkway (S.R. 429). The traffic shift includes shifting local access to several communities along the corridor, including Wekiva Park Drive. The traffic pattern changes will remain in place for months. The change will allow crews to remove the existing S.R. 46 bridge, allowing the construction of the remaining parkway bridges to progress.

Access to Wekiva Park Drive will require a short drive on the future extension of River Oaks Circle. Access to and from S.R. 46 will remain on the north side of the roadway and be shared with Wekiva River Oaks.

Electronic message boards have been posted. Please note construction schedules may change due to weather, or other circumstances
